

Unipar 24" Single Piece Basin

Model: Unipar 24" (Apollo Series)

SKU: SSB24

Product Overview

The Unipar 24" Single Piece Basin is a professional-grade sump pit designed for high-capacity water management. Featuring a unique bell-shaped architecture, this basin provides a superior reservoir volume that optimizes pump performance and extends equipment lifespan. It is specifically engineered to accommodate multiple pump configurations while providing a secure seal against soil gases and moisture.

Key Features

High-Capacity Reservoir

Large 24" bell-shaped design reduces pump short-cycling and extends motor life.

Triple Pump Support

Spacious interior accommodates up to three pumps for maximum redundancy.

Clear Two-Piece Lid

Transparent cover allows for instant visual inspection without breaking the seal.

Total Gas Seal

Includes a heavy-duty gasket to block radon, water vapor, and odors.

Pro-Ready Components

Pre-installed with a Dranjer drain, sealed cord pass-throughs, and discharge grommets.

Technical Specifications

Feature	Specification
Material	High-density structural polyethylene
Basin Type	Single-piece, Bell-shaped
Lid Type	Two-piece Clear (Airtight)
Diameter	24 Inches (Reservoir)
Seal	Full Perimeter Gasket
Hardware Included	Cord pass-throughs, discharge grommets, Dranjer drain
Application	Sump Pump Systems, Radon Mitigation, Foundation Waterproofing
